YETENEKLER

Research, Analytical Thinking, Team Leadership, Mathematics

EĞİTİM

Erzincan Binali Yıldırım University
Bachelor's Degree in Computer Engineering

DİLLER

English - B1

HAKKIMDA

I am a dedicated software engineer with a focus on cybersecurity and a passion for tackling complex problems through innovative solutions. With a solid foundation in both theoretical and practical aspects of computer science, I have a proven track record of successfully developing and optimizing systems. My experiences include leading teams to achieve project goals and utilizing analytical thinking to drive impactful results.

DENEYİM

Experience in banking with a focus on Cybersecurity

TEKNİK YETENEKLER & PROJELER

Yetenekler:

Research, Analytical Thinking, Team Leadership, Mathematics

Projeler:

☐ Project: bilgisayarliGorme | Language: C# - This image processing project, developed using C# and WPF, includes basic operations such as Grayscale Conversion, Negative Image Creation, and Histogram Drawing, as well as advanced algorithms like Sobel Edge Detection and K-Means Clustering (Euclidean and Mahalanobis). ☐ Project: matematikOgretmeni_websitesi | Language: TypeScript - This is a Next.js project bootstrapped with create-next-app. The project includes a development server setup, allowing users to view results in their browser and edit the application seamlessly. ☐ Project: tsp-optimization-python | Language: Python - A solution to the Traveling Salesman Problem (TSP) using Genetic Algorithms implemented in Python. It optimizes the shortest route through selection, crossover, and mutation operators, and visualizes the results.
